

PlayWorks

"Dramatic play opens the portals to possible and improbable worlds. Children inhabit situations which they are currently only imagining or exploring or fearing. They experience the world in another person's shoes and have the power to change the course of events from those in their normal daily lives."

Julie Fisher

Independent early years advisor

The interlocking, modular units can be arranged in endless ways. Stack or unstack them to accommodate children of many ages.

Cook in the morning, play doctor in the afternoon. You can do both with the same Stratford kit (See page 113).

There's a surprise inside: a soft cushion!
All tops are reversible and interchangeable.

The PlayWorks tops 'key' units together when stacking. Exclusive gravity loops secure the stack.

Playworks units have recessed handles, pinch-free hinges and no protruding hardware.

PlayWorks (continued)

Stack them, move them, add to them – the versatility and modularity of each PlayWorks unit allows you to choose and use what you want. Make your own combinations of these components, or choose one of our kits. It's easy to add to the kits. The larger kits have a greater variety of possible play themes.

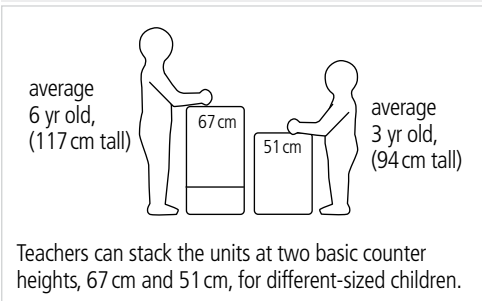

For ages 2 to 6.
(for reception and older children, plan for a counter height of 67 cm)

Solid European birch construction.

Mix and match PlayWorks furniture to create just the right play area.
