

Chair and table height guidelines

It comes down to a simple formula – comfort equals concentration and contentment. If children have furniture shaped to support their bodies’ best posture, they can stay focused on the work or play in front of them.

Determine the best chair height by seating a child with knees at 90° and feet flat on the floor. Measure the distance from the floor to the seating surface.

The table legs and chairs are size-marked to help determine the correct table/chair choice. Match the size marks on table and chair.
