

Installation instructions

A737, A738, A747, A748 Wall pegs and Wall pegs with labels

Installation

A **competent carpenter or maintenance person** should install your Wall pegs.

1. Attach the Wall pegs to the wall with at least four fasteners (as shown in the image below). Use fasteners that are suitable for the wall construction and the weight of the fully loaded item (fasteners are not included in the delivery).
2. Holes should be pre-drilled through the peg bar for the fasteners to pass through.
3. Once you have finished, make sure that the fixings safely support the weight of the fully loaded wall pegs.

⚠ WARNING

The Wall pegs must be properly mounted to a wall before use.
It is the customer's responsibility to ensure that the item is securely attached.
